

FREQUENTLY ASKED QUESTIONS (FAQs)

1. **What is Blue Ocean Technologies' mission?**

Blue Ocean Technologies (BOT) is a fintech company focused on providing after hours trading and data solutions to global investors. It was founded by trading industry veterans in 2016 with the vision of evolving market structure to make trading more accessible for all investors after traditional US eastern time trading hours.

BOT created an alternative trading system (ATS), Blue Ocean ATS, to match buy/sell orders of US National Market System (NMS) stocks during US overnight hours, from 8:00 PM ET - 4:00 AM ET.

2. **What is the difference between Blue Ocean Technologies & Blue Ocean ATS?**

Blue Ocean Technologies is the parent company of Blue Ocean ATS, LLC, a registered US broker dealer, and the operator of the Blue Ocean alternative trading system ("BOATS"). Blue Ocean ATS, LLC is a wholly owned subsidiary of Blue Ocean Technologies, LLC.

3. **Describe Blue Ocean ATS' (BOATS) offering?**

BOATS is an alternative trading system (ATS) for matching orders in US National Market System (NMS) stocks. BOATS is fully electronic and transparent. Subscribers to the ATS have access to the live, actionable quotes displayed on the ATS.

4. **How does Blue Ocean ATS operate?**

Blue Ocean ATS' core offering is the Blue Ocean Session, which operates overnight in the US from 8:00 PM ET- 4:00 AM ET (Sunday-Thursday). It operates only on those calendar days when the NYSE Trade Report Facility (TRF) is open for reporting the following morning. For example, when operating from Sunday evening at 8:00 PM to 4:00 AM ET Monday morning, the trades executed during that session will be reported to the NYSE TRF no later than 8:15 AM ET that same Monday morning.

Alternatively, the ATS does not open at 8:00 PM ET on Friday evening, because the NYSE TRF is not available for the reporting of trades on Saturday.

5. **Who is eligible to subscribe to the Blue Ocean ATS?**

Subscribers must be US broker dealers registered with the SEC and a member of at least one US self-regulatory organization (SRO).

If you are not a US broker dealer, you may access the ATS via a US broker dealer who is a Subscriber. Retail investors, institutional investors, and foreign financial institutions should reach out to their preferred US brokerage firm and request access to Blue Ocean ATS.

6. Which securities are eligible to trade?

All US National Market System (NMS) stocks are eligible to trade on the ATS. NMS stocks include ETFs (exchange traded funds), single-name stocks (i.e., stocks of individual companies) and ADRs (American Depositary Receipts).

Currently, a select group of leading ETFs is trading on BOATS. In the near future, the company expects to expand the list of available ETFs and add single-name stocks and ADRs.

8. Is trading on Blue Ocean ATS overnight the same as trading during US core market hours?

Yes, the process is the same and no new technology/protocol is required:

- Stocks are the same NMS stocks
- Technology: BOATS is FIX 4.2 compatible (Financial Information eXchange)
- Settlement and Clearing: clearing firm, NSCC and DTCC
- Trade reporting: in accordance with FINRA guidance (NYSE TRF and FINRA CAT)

9. How will I see my trades when they occur?

We provide subscribers with full depth-of-quote data, which can be delivered directly or in conjunction with Subscribers' third-party data vendors. During Blue Ocean Session, all trading information (order entry, executions, cancellations, etc.) are delivered electronically via FIX messaging.

10. Who are your current clients?

Our clients include institutional and retail investors. Leading US broker dealers are direct subscribers to the ATS and indirect subscribers via sponsored access. If you are a broker dealer that would like to connect to our ATS, please reach out to our team.

If you are an institutional investor, a retail investor, or a foreign financial institution who would like to access our liquidity, please have your preferred US broker dealer reach out to us.
